

**The Tuning & Testing/Practice Session is a  
"GO! GO! GO!"  
for Monday, May 20th @ AMP.**

Track will be "HOT" from 10am to 4pm.

\$100 fee, payable to ASCC.

3-5 vehicles on track at a time, depending on weather conditions, driving behaviour & fatigue. 15-20 minutes sessions per group, time starting when the first car of a group moves out of pitlane. Open-wheel with open-wheel, close-wheel with closed wheel. No decision yet on "missing wheel" vehicles...

In the absence any "new" guidelines from ASN, we will conduct this Tuning & Testing/Practice Session "status quo" - ie. as we have in the past.

Cars and driver equipment must pass technical inspection before putting a wheel on the track. No refunds if the car/equipment doesn't pass tech - this is in keeping with the race day refund policy/principal that fixed costs have to be recovered now that the event is a "go".

Inspection services will be available at the track Monday, May 20th (8am-12noon), late Saturday afternoon, May 25th, and Sunday morning, May 26th. Contact Geoff Schnare for details.

Special thanks to those who took the plunge and registered before the April 28th "Go/No Go" date...
